Elijah Has Cancer

Elijah has Burkitt's lymphoma. This is a cancer of the lymph glands, the liver and the spleen. Burkitt's lymphoma is a very common cancer in children in Africa. Elijah is 1 year, 9 months. He has a twin sister who is very healthy.

While at St. Mary's hospital, Lacor, Uganda, we arranged for all the family to come to visit. Elijah was so happy to see his two sisters and two brothers, this mother and father and his grandmother.

Elijah and his mother with Dr. Simone

2 brothers, father
and Dr. Simone

We gave Elijah and his family some of your gifts.

Thank you and GOD BLESS YOU,
Andrew A. Simone M.D.
